Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-15, drawn to a composition comprising hybridoma cell culture, classified in class 435, subclass 346.
 - II. Claim 16, drawn to a monoclonal antibody produced by hybridoma cell (product-by-process claim), classified in class 530, subclass 389.1.
 - III. Claims 17-20, drawn to a hybridoma cell line, classified in class 435, subclass 346.
 - IV. Claims 21-22, drawn to a monoclonal antibody, classified in class 530, subclass 389.1.
 - V. Claims 23-26, drawn to a monoclonal antibody and a composition, classified in class 530, subclass 389.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I, II, III, IV and V are all drawn to distinct products, which are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Thus restriction between the groups is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Eventhough some of the groups are classified in the same class/subclass, this has no effect on the non-patent literature search. Different inventions or groups would require completely different searches in non-patent databases, and there is no exception that the searches

Art Unit: 1639

would be co-extensive. Therefore, these do not create an undo search burden, and restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

A) If applicants elect either group, applicants are further requested to elect a single species for each of the following:

a) a single species of hapten (cocaethylene comprises N-methyl tropane substituted at the para-position with a carboxyethyl group or N-ethyl carboxamide...)

b) a single species of linking group.

B) Further if group II is elected applicants are requested to elect a single species of antigenic protein.

For this response to be complete and for search purposes, applicants should provide the chemical structure of elected compounds (or species), wherein each specific formula substituents of each of the above identified elected species are defined either by picture, or by expressing the species in terms of the variables of the formula.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 13 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1639

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

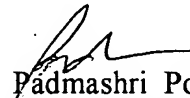

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
